Dear Mr. Craig:

List below are Ohio EPA's comments on the Plant 1 Ore Silo
Removal Action Work Plan:

General Comment

1. Section 6: The work plan states that several activities in this section will be detailed in the design phase of the removal action. DOE must provide engineering drawings to the EPAs as they are developed.

Specific Comments

1. Executive Summary, Page iii, Paragraph 6: Appendix H appears to be an integral part of the sampling and analysis plan in Section 8. A complete sampling and analysis plan must be part of the removal action work plan. Appendix H must be incorporated into Section 8 for review and approval by the Agencies.
2. Section 1, Page 1-1, Paragraph 2: The work plan must state that project activities will be completed in accordance with the RI/FS QAPP.
3. Section 2, Page 2-1, Paragraph 2: Change the last sentence to include inorganic waste constituents as part of the current waste inventory.
4. Section 2, Page 2-1, Paragraph 3: "Suspect Areas" is no longer part of the OU3 definition. Use the operable unit definitions in the Amended Consent Agreement.
5. Section 4, Page 4-1, Paragraph 3: Have HSL analyses been performed on samples of waste from inside the silos? If not, this data needs to be collected. If the data has been collected, please incorporate it in this work plan.
6. Section 6.2, Page 6-3, Paragraph 3: Discuss the location(s) of the transite structures. 1
